

Flex Led Neon Light

N1010D

Product Specification

LED strip colloid specifications comparison

Materials	Silicone flexible led strip	PVC flexible led strip	Notes
Main parameters			
Colloid features in -40°C	No crack after 30 days	Totally cracked	The low temperature resistant of silicone is superior than PVC or epoxy materials
Colloid features in 120°C	No obvious change after 72 hours	Colloid changed into yellow and deformed after 2 hours	The high temperature resistant of silicone is superior than PVC or epoxy
Colloid features in 180°C	No obvious change after 72 hours	Colloid changed into brown and some melted after 20 minutes	Over 150°C, PVC is easily hydrolyzed, Viscosity becomes weaken and easily seperated
Steadily lighted in Seawater for 72 hours	No obvious change	Serious atomization on the surface	The waterproof grade of silicone led strip can reach to IP67, high resistance to acidic alkali and salt properties
Thermal conductivity	Good thermal conductivity	No thermal conductivity	Pvc and epoxy cannot conduct heat, while silicone has good thermal conductivity

Product features

- Anti-yellowing and heat resisting silicone glue, chemical resistance acid and alkaline, available for extremely terrible outdoor environment.
- Uniform and soft luminance, no light spot.
- Super brightness large chip, golden wire welded and copper led holder for quicker heat dissipation, higher stability, longer life span.
- Leadless SMT technique (RoHS certificated), smooth welding joint, firm connection of led and pcb.

Specification

Horizontal Bending (Silicone)

IP67 Protection	Flame Resistant	UV Resistant	Solvents Resistant	Saltwater Resistant
Dirt Resistant	CRI90	3 Years Warranty	Ambient Working 50°C -20°C	Anti Yellowing

Model Number	N1010D	Size (mm)	10*10
PCB Limited (mm)	8mm	IP Grade	IP67
Working Temperature	-20 to 50°C	N.W.(G/M)	84g

Dimensions of light

Recommend LED strip parameters

SMD2835, 120 LED/meter									
Part number	Color	Luneh/M (LEDS)	Lumen/M (with neon tube)	Cut every (LEDS)	LED Qty/M	Voltage	Power/M	PCB Width	Packing/M
SUR-2835FWW120-24V	WW	1000	760	6	120	24V	10W	8mm	5 Meters/reel
SUR-2835FNW120-24V	NW	1100	840						
SUR-2835FCW120-24V	CW	1150	880						

Product system solutions

Cut mark

Remarks: There is a transparent window at the bottom of the light strip,

Make precise vertical cuts at the exact cut position of the light strip.

Please do not arbitrarily cut or cut into a bevel and arc section.

Installation accessories

Cables and Connectors

End Cap with Hole

End Cap

Mounting clip (Optional)

Glue

Installation

This product is suitable for surface mounting or embedded sealing installation. Recommended slot size: Width 16mm, Depth 15mm, gently press the neon sleeve into the slot.

Installation of carrier

1. When installing the LED strip, install it from both ends at the same time, installation from one direction is prohibited.

⚠ If the length of LED strip is over 2m, it is recommended to install by two persons.

2. Use tool to disassemble carefully, and do not pull the LED strip directly.

⚠ If the length of LED strip is over 2m, it is recommended to disassemble by two persons.

Cautions

- Please notice that the strips are not bendable to all directions. As the appropriate specific shape and degree, please follow the following instruction.
- LED strips are low voltage products, you must use the power supply (transformer). Please don't connect the led strip directly to the AC 110V or AC 220V. Otherwise, it will burn out the LED strips and lead to safety (security) accidents.
- Please read the specifications thoroughly before installation by professional staff to make sure the safe use.
